Series 2 Invitation Postcard

Ameren Transmission Company of Illinois proposes to build a new 345,000-volt electrical transmission line in Adams County. Federal Aviation Administration regulation requirements have made construction of a two mile portion of the Quincy to Meredosia segment of the Illinois Rivers Project, approved for construction by the Illinois Commerce Commission in Docket 12-0598, impractical in its current location. The Adams County Rd 550 Connector will connect to each end of that two mile portion in a manner consistent with FAA requirements. The estimated in-service date for the Quincy to Meredosia segment of Illinois Rivers Project including this new transmission line is by the end of 2016.

If you have any questions, contact our team any time via email at adamscountyconnector@ameren.com or by phone at 888.825.1816.

PLEASE JOIN US

Please join us for an open house - because your input matters.

Your opinion is vital in the development of the project. The open houses will provide a project overview and an opportunity to collect your input.

LOCATION	DATE and TIMES
The Salvation Army Ray & Joan Kroc Corps Community Center - Meadows Room 405 Vermont Street Quincy, IL 62301	Tuesday, January 13 11 a.m. - 2 p.m. and 4 p.m. - 7 p.m.

The same information will be provided at each open house. Arrive any time during the open house times. Refreshments will be provided.

RE: Adams County Rd 550 Connector – Open House Invitation

Dear NAME,

Last month, Ameren Transmission Company of Illinois (ATXI) announced and held a series of open houses for the new 345,000-volt electrical transmission line in Adams County. Federal Aviation Administration (FAA) regulation requirements have made construction of a two mile portion of the Quincy to Meredosia segment of the Illinois Rivers Project, approved for construction by the Illinois Commerce Commission (ICC) in Docket 12-0598, impractical in its current location. The Adams County Rd 550 Connector will connect to each end of that two mile portion in a manner consistent with FAA requirements. A map of the proposed routes is enclosed for your review. For detailed maps, visit our project website at AdamsCountyConnector.com and click Maps.

The Adams County Rd 550 Connector is necessary to provide adequate, reliable, and efficient service to area customers, will promote the development of an effectively competitive electricity market that operates efficiently, is equitable to all customers, and is the least cost means of satisfying those objectives. Approval of this new line is necessary to realize the full benefits of the Illinois Rivers Project, which, once integrated into the existing Illinois electric transmission system, will increase reliability, deliver renewable energy, and provide additional economic and market efficiency benefits to Illinois customers and customers outside Illinois. The estimated in-service date for the Quincy to Meredosia segment of the Illinois Rivers Project including this new transmission line is by the end of 2016.

We invite you to join us at the second series of open houses to talk with our project representatives. Each open house will be arranged in a station format. Detailed maps will be available for you to provide input on the proposed routes. The same information will be used at each open house. There will be no formal presentation; you are welcome to attend anytime during the hours listed. Refreshments will be available.

**The Salvation Army
The Ray & Joan Kroc Corps Community Center - Meadows Conference Room
405 Vermont St Quincy, IL 62301**

**Tuesday, January 13
11:00 a.m. – 2:00 p.m. and 4:00 – 7:00 p.m.**

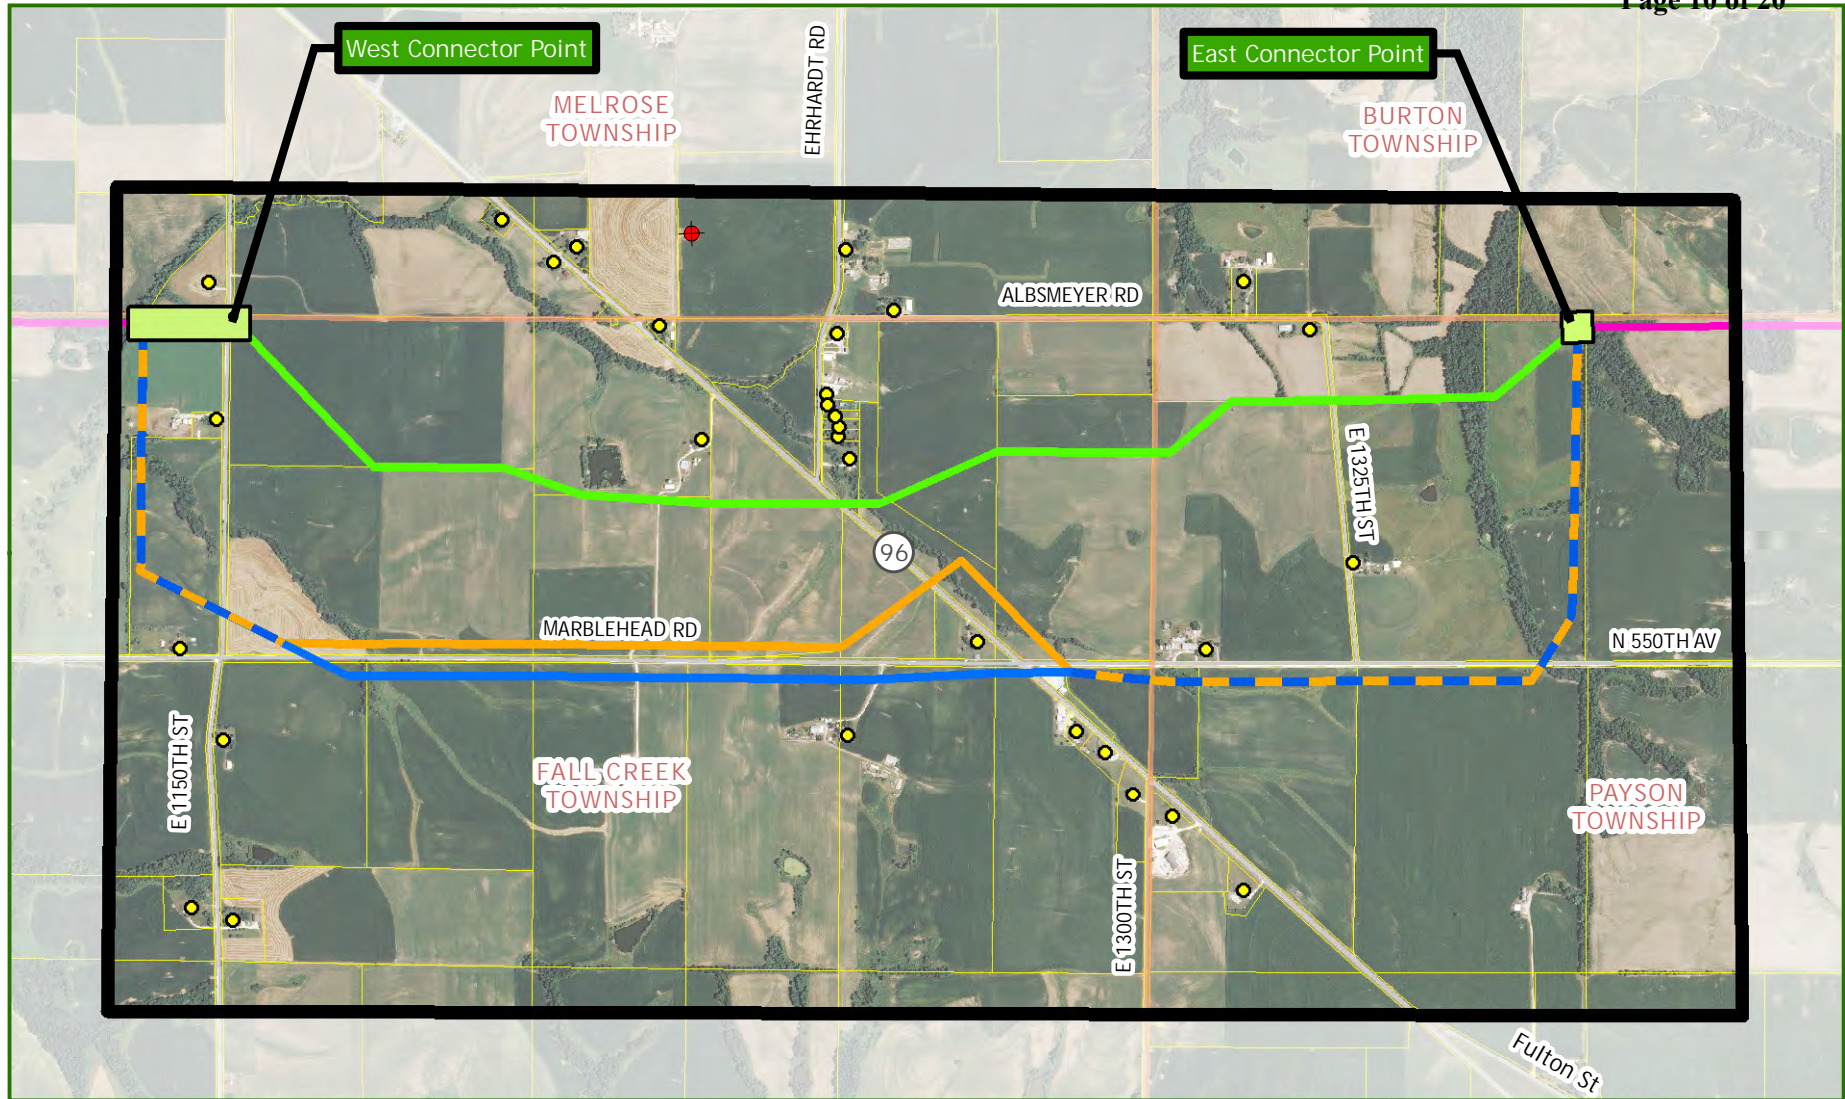

The open houses are part of the process in which ATXI will file a petition with the ICC requesting approval of the Adams County Rd 550 Connector and of the recommended route.

For additional information, visit our website (AdamsCountyConnector.com), send us an email (AdamsCountyConnector@ameren.com), or call our toll-free information line (888.825.1816).

Sincerely,

Peggy L. Ladd
Director, Ameren Transmission Stakeholder Relations
